Education

Thapar Institute of Engineering and Technology

Aug 2024 – Present

Bachelor of Technology in Data Science and Artificial Intelligence

Experience

Product Management Intern - CashKaro

Jun 2026 – Present

- Led delivery of a creator storefront feature on India's leading affiliate platform (**2M+** users), covering user research, competitive benchmarking, and Colab prototyping, cutting the research-to-prototype cycle by **50%**
- Designed automation workflows and research pipelines across **4** product verticals, eliminating **10 hrs/week** of manual effort while shaping product roadmap strategy with founding leadership, engineering, and design.

ML Intern - Thapar Institute of Engineering and Technology

May 2025 – Jul 2025

- Led a **4-member ML team** to build a **CNN-based skin cancer detection system**, trained on **10,000+ dermoscopic images** using transfer learning and augmentation.
- Built an **end-to-end medical imaging pipeline** covering preprocessing through inference in Python and PyTorch, achieving **93% classification accuracy**.

Deep Learning Intern - DevRhyme Foundation

Jan 2025 – Mar 2025

- Developed **PyTorch preprocessing and training pipelines** across **20k+ samples** and multiple neural architectures, boosting model performance by **15%** through feature engineering, optimization, and dataset balancing.

Co-Founder - Oorja

Oct 2022 – Jan 2024

- Co-founded and led a **4-member team** building an **energy-harvesting wearable** converting foot pressure to electricity, delivering an MVP validated through **50+ user trials**.
- Spearheaded product strategy and investor outreach across academic and startup ecosystems, securing a **INR1,00,000 innovation grant from IIT Delhi** for prototype development and commercialization.

Projects

SkillSphere - Recruitment Intelligence Platform

[GitHub](#) [Live Demo](#)

- Architected a **full-stack AI recruitment platform** with React, FastAPI, and Supabase, featuring a multi-agent pipeline to evaluate candidates **beyond keyword matching** with explainable AI scoring.
- Engineered a **weighted XAI scoring engine** across skill fit, learning velocity, and productivity readiness, surfacing rationale, strengths, gaps, and contribution insights, cutting decision time by **60%**.
- Deployed a **production-grade split architecture** (Cloudflare Pages + Render) with Supabase JWT auth, owner-scoped data isolation, CORS hardening, rate limiting, and PDF signal extraction from GitHub, Codeforces, and resumes across **5+ backend AI routes**.

TruthLens - AI Content and Bias Detector

[GitHub](#)

- Built a **privacy-first browser extension** using DistilBERT fine-tuned on **50k+ samples** to detect AI-generated text, synthetic media, and linguistic bias with **89% accuracy**.
- Deployed **TensorFlow.js** inference for **sub-second on-device analysis**, ensuring **100% data privacy**.

Technical Skills

Languages

Python, C++, C, SQL, JavaScript, HTML, CSS

AI / ML

Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, LLM Applications, Retrieval-Augmented Generation, Agentic AI, Model Optimization

Tools & Frameworks

PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers, LangChain, FastAPI, Flask, Django, Docker, React, REST APIs, Git, Authentication, Backend Systems

Achievements

- Selected among the **Top 10 Student Entrepreneurs in India** - Youth India Ideathon, IIT Delhi.
- Runner-Up at Cyber AI Hackathon, University of Derby, and Agentic AI Hackathon, Ulster University.
- McKinsey Forward Program '26.
